

# Gautam Bhagat

Pune, MH, India • +91 9970102190 • [gautambhagat.business@gmail.com](mailto:gautambhagat.business@gmail.com) • [github.com/gautamb02](https://github.com/gautamb02) • [linkedin.com/in/igautambhagat](https://linkedin.com/in/igautambhagat)

## EDUCATION

### Pimpri Chinchwad College of Engineering

B.Tech, Computer Science and Engineering (AI & ML)

Pune, MH

May 2025

## WORK EXPERIENCE

### Nudgebee

Software Development Engineer I

Pune, MH

Nov 2025 – Present

- Work across an AI-agent platform for cloud debugging and SRE/Ops automation — improving agent accuracy, reducing RAG retrieval latency, and refining prompt and tool-use reliability.
- Architected the image-support system, enabling agents to ingest and reason over visual inputs such as dashboards, screenshots, and diagrams within their workflows.
- Designed context-engineering strategies for long-running conversations, optimizing how context is selected, compressed, and carried across extended multi-turn sessions.
- Built memory-extraction pipelines that distill durable facts and insights from conversations, improving recall and continuity across sessions.

### Lemma Technologies

Software & GenAI Engineer

Software Engineer Intern

Pune, MH

July 2025 – Nov 2025

Dec 2024 – June 2025

- Built a GenAI-powered pipeline generating DCO ad creatives for DOOH, mobile, web, and social, replacing manual design workflows; used Golang channels for parallelism to deliver production-ready ads in 30–50 secs.
- Revamped the campaign forecasting engine with LLM-driven insights to analyze viewership patterns and deliver real-time predictions under 4 seconds, improving KPI alignment and advertiser decision-making.
- Developed an end-user-facing MCP client letting users query UI dashboards and trigger API actions in natural language, enabling text-based analytics and automated decision-making workflows.

### Muks Robotics

AI & ML Engineer

Pune, MH

April 2024 – July 2024

- Engineered a real-time face recognition system for factory access control, enabling seamless authentication for 1,500+ employees.
- Deployed a PPE violation detection system for construction sites using OpenCV, cutting weekly safety violations from ~100 to 15–20 within four weeks via real-time compliance alerts.

### DIBC | Full Stack Developer

Jan 2022 – July 2022 | Mumbai, MH

- Built scalable Django backends for Greenvue Ads (a cab-based ad platform deployed across 150+ cabs), handling 10K+ daily API calls and cutting server response time 40% via async views and optimized endpoints.

## UNIVERSITY PROJECTS

- **FOGAN-X** — Custom GAN-based dehazing algorithm using PyTorch and CNNs, integrated with a real-time drone feed via RTSP, enhancing visibility by 40% and halving processing time for disaster-response operations.
- **ScoreCraft** — AI exam platform (FastAPI, React, LLMs) with 93% grading accuracy, featuring RAG-based question generation, real-time facial recognition, and tab-switch detection for automated scoring and integrity.

## SKILLS

- **Programming:** Python, Golang, Java, JavaScript, TypeScript, C++
- **Frameworks:** React, Next.js, Django, Node.js, Express, FastAPI, TensorFlow, PyTorch
- **Data & Cloud:** PostgreSQL, MySQL, MongoDB, Firebase, Qdrant, AWS, GCP, Docker, Git, JIRA
- **AI / ML:** Transformers/BERT, CNNs, Deep Learning, RAG, AI Agents (ReAct/ReWOO), MCP, Context Engineering, N8N

## ACTIVITIES

- Led PCCOE's GeeksforGeeks Chapter (50+ execs); ran a 700+ attendee tech talk and a 150+ hackathon.
- National Finalist in SIH 2023 (top of 44,000+) and La Trobe's global Tech Infusion Smart City Challenge (top of 8,000+).
